What the audience tells us

Kashyap is not only being seen by developers. The audience includes founders, brand managers, e-commerce marketers, Shopify partners, ad/growth people, commerce SaaS operators and design-led profiles. That is the right mix for premium Shopify positioning.

Top industries in the audience

Why this matters

The audience is useful because it clusters around the same problems Kashyap wants to own: Shopify quality, brand trust, product presentation, conversion, paid growth and premium positioning.

How to read this page

Follower growth shows the profile is gaining attention. The company and demographic view tells us where that attention is coming from: Shopify, software, retail, agency, design and commerce-adjacent networks.

How To Read The Visitor Tiers

Use this before reading the directory

Tier 1 - Priority ICP

Founders, brand managers, brand partners, ad/growth partners, agency leaders and commerce operators. These are the people closest to buying, referring, or opening doors for premium Shopify work.

Tier 2 - Champions and Partners

Other developers, Shopify partners, CRO specialists, commerce tech operators and technical profiles. They may not be the buyer, but they can validate Kashyap's authority and send referrals.

Tier 3 - Ecosystem Reach

Broader marketing, AI, BD, creative and software practitioners. This group is useful for reach and credibility, but it should not drive the main follow-up list.

Others / Internal

Internal agency or co-founder activity should be removed from client-facing interpretation. Company-only viewers are not listed unless the person name is visible.

How to use this

Start with Tier 1. Those are the profiles Kashyap should review manually and warm up through comments, profile visits, thoughtful DMs or partner conversations. Tier 2 is the credibility layer. Tier 3 is helpful, but not the main business opportunity.

Profile Visitors - Classified 1

Tier 1 buyers, Tier 2 champions and Tier 3 ecosystem signals

Name	Title	Company	Tier	Category	Why ICP matters
Aishwarya Puranik	Marketing Manager Brand Strategy Luxury Retail Marketing	Luxury Retail	Tier 1	Brand manager / Luxury retail	Brand managers are a priority ICP because they own perception, product storytelling and premium buying behaviour. Her viewing signals Kashyap's design-trust angle is reaching people who care about brand quality, not cheap execution.
Khayelihle Ntaka	Founder @ Command Ledger	Command Ledger	Tier 1	Founder	Founder attention matters because founders buy judgment and outcomes. This is the kind of viewer who may not need a Shopify build today, but can become a buyer, referrer or strategic connector.
Marco Ciaccia	Founder		Tier 1	Founder	Founder viewers are high-value because they benchmark operators and agencies before a need becomes public. This is the commercial audience Kashyap should quietly warm up.
Romiluyi Abiodun	Founder & Creative Director		Tier 1	Founder / Creative partner	Founder plus creative direction is a strong fit for premium brand work. This person understands design as business value, which matches Kashyap's positioning.
Jolene Henkeman	Email & Ads Marketing eCommerce customer acquisition		Tier 1	Ad / Growth partner	Ad and retention partners are valuable ICP-adjacent viewers. They sit close to the same e-commerce revenue problem: traffic is expensive, so the Shopify experience has to convert.

How to read this

The why-they-matter note is the main value. It connects the person to Kashyap's ICP instead of simply repeating their title.

Profile Visitors - Classified 2

Tier 1 buyers, Tier 2 champions and Tier 3 ecosystem signals

Name	Title	Company	Tier	Category	Why ICP matters
Prachi Kumar	Partnerships @ OneXtel WhatsApp, RCS & SMS growth	OneXtel	Tier 1	Brand partner / Commerce comms	Commerce messaging and partnership leaders can become referral partners. They understand owned-channel growth and can carry Kashyap into conversations with brands.
Gita Sinha	Online PR and corporate image management		Tier 1	Brand partner / PR	PR and image-management viewers are relevant because premium Shopify is partly a trust problem. This profile validates that Kashyap's content is crossing into brand reputation territory.
Bagher Ahmadi	Co-founder, iWAND Agentic AI Stylist for Shopify Fashion	iWAND	Tier 1	Founder / AI commerce	AI styling for Shopify fashion sits at the intersection of commerce, fashion and conversion. This is exactly the sort of founder/operator category Kashyap should be visible to.
Yash P Y	Scaling Shopify Brands Through CRO, Custom Development & Growth Strategy		Tier 2	Shopify partner / CRO	Shopify CRO partners are not always buyers, but they are strong champions. They can validate Kashyap's thinking and create referrals inside the same category.
Sagar Vaghela	Senior Shopify Designer CRO-focused design		Tier 2	Shopify designer / CRO	A senior Shopify designer is a useful peer signal. This audience understands the craft and can help Kashyap build category credibility.

How to read this

The why-they-matter note is the main value. It connects the person to Kashyap's ICP instead of simply repeating their title.

Profile Visitors - Classified 3

Tier 1 buyers, Tier 2 champions and Tier 3 ecosystem signals

Name	Title	Company	Tier	Category	Why ICP matters
Dinesh Kumar	Senior Technical Lead Shopify & Full-Stack Expert		Tier 2	Shopify technical partner	Senior Shopify technical viewers are useful champions. They may not buy, but they can validate technical judgment and amplify Kashyap's authority among implementation partners.
Ankur Singh S	Shopify Developer Liquid, custom sections, theme customization		Tier 2	Shopify developer	Shopify developers are ecosystem amplifiers. They matter because they understand whether Kashyap's ideas are technically credible.
Hardik Rathavi	Bubble.io Certified Shopify Laravel Developer		Tier 2	Developer / Shopify adjacent	Developer attention matters when Kashyap talks about quality and implementation. This is a peer/champion segment, not the main buyer group.
Aftab Pathan	Frontend Engineer React.js, Next.js, TypeScript		Tier 2	Frontend developer	Frontend engineers are useful because premium Shopify depends on performance, interface and implementation quality. This is a technical champion signal.
Chintan Raval	Driving SaaS revenue Account Executive at SwiftSku	SwiftSku	Tier 2	SaaS GTM / Commerce tech	Commerce-SaaS GTM people can become connectors. They understand the revenue problem around stores, tools and conversion, even if they are not the direct buyer.

How to read this

The why-they-matter note is the main value. It connects the person to Kashyap's ICP instead of simply repeating their title.

Profile Visitors - Classified 4

Tier 1 buyers, Tier 2 champions and Tier 3 ecosystem signals

Name	Title	Company	Tier	Category	Why ICP matters
Anth Walker	Director of Finance at Visualsoft	Visualsoft	Tier 2	Commerce software operator	Finance leadership at an e-commerce/software company is a useful commercial signal because budget, margin and growth all connect to conversion work.
Anushk Goel	IP Consultant at GreyB Supporting IP Strategy	GreyB	Tier 3	Strategy / Research	This is not core Shopify ICP, but it suggests Kashyap's positioning touches defensibility, category language and differentiation.
Fakhruddin KW	Software Developer .NET, SQL, SPFx, SharePoint, Power BI, Azure		Tier 3	Tech practitioner	Not a direct buyer, but technical practitioners widen software-community reach and add credibility around implementation themes.
Meda Riya Reddy	AI & Machine Learning enthusiast Deep Learning, NLP, Computer Vision		Tier 3	AI practitioner	AI practitioners expand reach around AI and product quality. Useful for awareness, but less important than founders, brand managers and Shopify partners.
Gyorgy Richard Kiss	Business Development & Client Partnership Manager		Tier 3	BD / Recruitment	Adjacent business-development reach. Useful for network spread, but not a core Shopify buyer signal.

How to read this

The why-they-matter note is the main value. It connects the person to Kashyap's ICP instead of simply repeating their title.

Profile Visitors - Classified 5

Tier 1 buyers, Tier 2 champions and Tier 3 ecosystem signals

Name	Title	Company	Tier	Category	Why ICP matters
Daniel Dramshev	HVAC Marketing Consultant		Tier 3	Adjacent marketing	Cross-industry marketing attention shows the ideas are understandable beyond Shopify, but this is not a priority buyer segment.
Anza Javaid	Lead 3D Artist AI + 3D workflows for video production		Tier 3	Creative / AI	Creative AI attention supports the visual-quality theme, but it is an ecosystem signal rather than a direct commercial ICP.
Ibraheem Rashid	Senior Business Development Professional		Tier 3	BD / Partnerships	Partnership viewers can spread the content, but this profile is more connector than buyer for Kashyap's offer.

How to read this

The why-they-matter note is the main value. It connects the person to Kashyap's ICP instead of simply repeating their title.

Tier 1 - Direct ICP Signals

Founders, brand managers, brand partners, ad partners and commerce operators

Aishwarya Puranik - Brand manager / Luxury retail

Brand managers are a priority ICP because they own perception, product storytelling and premium buying behaviour. Her viewing signals Kashyap's design-trust angle is reaching people who care about brand quality, not cheap execution.

Khayelihle Ntaka - Founder

Founder attention matters because founders buy judgment and outcomes. This is the kind of viewer who may not need a Shopify build today, but can become a buyer, referrer or strategic connector.

Marco Ciaccia - Founder

Founder viewers are high-value because they benchmark operators and agencies before a need becomes public. This is the commercial audience Kashyap should quietly warm up.

Romiluyi Abiodun - Founder / Creative partner

Founder plus creative direction is a strong fit for premium brand work. This person understands design as business value, which matches Kashyap's positioning.

Jolene Henkeman - Ad / Growth partner

Ad and retention partners are valuable ICP-adjacent viewers. They sit close to the same e-commerce revenue problem: traffic is expensive, so the Shopify experience has to convert.

Prachi Kumar - Brand partner / Commerce comms

Commerce messaging and partnership leaders can become referral partners. They understand owned-channel growth and can carry Kashyap into conversations with brands.

Gita Sinha - Brand partner / PR

PR and image-management viewers are relevant because premium Shopify is partly a trust problem. This profile validates that Kashyap's content is crossing into brand reputation territory.

Bagher Ahmadi - Founder / AI commerce

AI styling for Shopify fashion sits at the intersection of commerce, fashion and conversion. This is exactly the sort of founder/operator category Kashyap should be visible to.

Viewer Evidence

Profile viewer screenshots from LinkedIn

Why this screenshot matters

This is where the audience intelligence starts: named founders, brand managers, Shopify partners and commerce-adjacent profiles. The directory only includes people we can name clearly.

What This Audience Is Telling You

July strategy from viewer intelligence

Premium Shopify is the right lane

The audience mix supports Kashyap's strongest positioning: premium Shopify work that connects design, trust and conversion.

AI should be discussed through trust

AI-commerce viewers are present. Kashyap should talk about AI only through buyer trust, product presentation and brand risk.

Luxury and retail viewers matter

These viewers care about perception, visuals and brand confidence. They are not looking for commodity Shopify execution.

Founder viewers are warm signals

Named founder viewers should be treated as relationship opportunities, especially when they fit e-commerce, software, design or commerce partnerships.

Next month action

Build a monthly Tier 1 watchlist and follow up through thoughtful engagement, not cold pitching. Use their profile language to shape future posts.
