What May's audience tells us

Jose's audience skews heavily toward Revenue Operations leaders, VP-level GTM operators, PE/VC-backed operators and software founders. This is not vanity attention. It is the RevOps operating class watching his work.

Visitor breakdown

Jose, Here's What's Actually Happening

Five direct audience callouts

200 anonymous = senior people hiding

Private-mode visitors are not a weakness. Senior buyers, operators and investors often browse quietly before they engage.

3 PE/VC investors

PE/VC operators do not browse randomly. They search for people who can help portfolio companies with GTM and revenue systems.

8 founders, including Mirek's DM intent

Founder viewers mean relationships are starting. A founder asking for a DM is not passive reach; it is an early relationship signal.

14 RevOps leaders

This is Jose's tribe becoming an informal amplifier network. They can validate, share and benchmark his frameworks.

8 GTM Strategy leaders

These are connectors. They carry ideas into rooms Jose has not entered yet: leadership meetings, portfolio reviews and hiring conversations.

Demographics + Geographics

Where Jose's audience is coming from

The demographics show fit: software, IT consulting, technology, senior operators, directors, VPs and CXOs. The geography shows Jose is not only reaching one local market; the audience spans North America, India and the UK.

Top geographies

ICP-fit demographics

Why this matters

Jose's ICP is not broad LinkedIn reach. It is senior RevOps, GTM, sales and executive operators who can buy, refer, amplify or benchmark his thinking. The demographic and geography mix supports that.

Clayton Bornmann	Co-Founder & CMO	Founder / CMO	Founder-CMO audience connects RevOps thinking to GTM leadership and growth decisions.

Tier 1 read

These are not passive readers. They are people who design, fund, buy or influence RevOps infrastructure. Jose should treat Tier 1 as the monthly warm audience list.

Tier 2, Tier 3, and Ecosystem

Champions, practitioners and adjacent distribution

Name	Role	Tier	Why they matter
Jeremy Trudell	Sales Operations, AssetMark	Tier 2	Practitioner champion who can validate Jose's systems thinking inside sales ops circles.
Christopher Pinske	Management / Ops Engineer	Tier 2	Advisor/operator layer. Useful referral and implementation ecosystem.
Greg Wakefield	Executive Leader / Ops	Tier 2	Talent and leadership market signal around RevOps demand.
Nabeel Ebeid	Finance, Strategy and Ops	Tier 2	Adjacent ops-finance audience for ROI and operating discipline content.
Richard Fifield	Internal Audits, CalSTRS	Tier 3	Governance-adjacent profile showing reach beyond SaaS.
Pushpendra Mittal	BDR team builder	Tier 3	Sales development ecosystem signal, relevant to GTM systems topics.

Ecosystem read

Champions and adjacent operators may not buy directly, but they recommend, validate, forward and bring Jose's thinking into conversations. This is how audience becomes distribution.

What This Audience Is Telling You

Strategic read - May 2026

The RevOps operating class is watching

40 named viewers are director-level or above RevOps, GTM, operations, founder or investor profiles. This is Jose's exact market.

PE/VC operators signal leverage

Investors and operating partners can turn one trusted idea into portfolio-wide introductions. They matter more than their count suggests.

Peer and competitor layer is engaged

RevShoppe, SalesGlobe and RevOps media/operator profiles mean Jose is being benchmarked by people in the category.

International operators are breaking through

Wallapop, Vancouver, London, Chennai, Bengaluru and Toronto signals show the audience is broader than one geography.

Next month action

Build a Tier 1 watchlist. Engage naturally with the 40 ICP viewers, especially RevOps leaders, GTM strategy leaders, founders and PE/VC operators.
