What the audience tells us

Kashyap's audience is commerce-heavy: Shopify, e-commerce, retail, design, software and marketing profiles. The strongest signal is that the account is starting to connect premium Shopify work with trust, conversion and design taste.

Why this evidence matters

The follower-growth and demographic screenshots prove this is not a made-up strategy read. The audience is moving toward the right professional context: Shopify, software, retail, marketing and design.

Profile Visitors - Classified 1

Tier 1 buyers, Tier 2 champions and Tier 3 ecosystem signals

Name	Title	Company	Tier	Category	Why ICP matters
Bagher Ahmadi	Co-founder, iWAND Agentic AI Stylist for Shopify Fashion	iWAND	Tier 1	Shopify AI / Fashion	Direct ICP signal. AI styling for Shopify fashion sits exactly at the intersection of premium commerce, fashion, product experience and conversion.
Aishwarya Puranik	Marketing Manager Brand Strategy Luxury Retail Marketing	Luxury Retail	Tier 1	Luxury retail / Brand	Luxury retail cares about taste, perception, visual trust and premium buying behaviour. This is the audience Kashyap needs for high-ticket Shopify work.
Khayelihle Ntaka	Founder @ Command Ledger	Command Ledger	Tier 1	Founder	Founder attention matters because founders buy judgment, not just implementation. A founder viewer is a possible buyer, referrer or strategic connector.
Someone at Lieblingsgarn GmbH	Company viewer	Lieblingsgarn GmbH	Tier 1	E-commerce brand	Brand-side company viewer. More commercially useful than broad practitioner attention because this can become a direct lead.
Someone at Refactor Plus	Shopify agency viewer	Refactor Plus	Tier 1	Shopify ecosystem	Agency/ecosystem attention means Kashyap is being watched inside the category where referrals and comparisons happen.
Yash P Y	Scaling Shopify Brands Through CRO, Custom Development & Growth Strategy		Tier 1	Shopify / CRO	Direct category fit: Shopify, CRO, custom development and growth strategy. This viewer validates the exact positioning lane.
Someone at Wellness Extract	Company viewer	Wellness Extract	Tier 1	Wellness commerce	Wellness is a strong Shopify/D2C category. A company-level viewer is a possible buyer signal, especially when Kashyap is writing about premium product pages and trust.
Someone at Duck.design	Company viewer	Duck.design	Tier 1	Design / Commerce	Design-company attention matters because Kashyap's premium Shopify positioning depends on taste, conversion and visual authority.
Sagar Vaghela	Senior Shopify Designer CRO-focused design		Tier 1	Shopify design / CRO	This is a direct category signal. Shopify design and CRO specialists watching Kashyap means his authority is landing inside the same buying and referral ecosystem.
Marco Ciaccia	Founder		Tier 1	Founder	Founder viewers matter because they can buy, refer, or benchmark Kashyap against alternatives. This is higher-value attention than broad creator engagement.

How to read this

Tier 1 is the commercial audience to watch closely. Tier 2 can influence referrals, implementation and category credibility. Tier 3 is useful reach, but not the priority follow-up list.

Profile Visitors - Classified 2

Tier 1 buyers, Tier 2 champions and Tier 3 ecosystem signals

Name	Title	Company	Tier	Category	Why ICP matters
Romiluyi Abiodun	Founder & Creative Director		Tier 1	Founder / Creative	Founder plus creative direction is a strong signal for premium brand work. This audience cares about design judgment, not only development.
Aftab Pathan	Frontend Engineer React.js, Next.js, TypeScript		Tier 2	Technical champion	Technical viewer who understands implementation quality. Useful champion layer for Shopify build credibility.
Anushk Goel	IP Consultant at GreyB Supporting IP Strategy	GreyB	Tier 2	Strategy / Research	Adjacent strategy viewer. Useful because premium brands also care about IP, differentiation and defensible assets.
Gita Sinha	Online PR and corporate image management		Tier 2	PR / Brand	Brand reputation viewer. Fits the premium-positioning side of Kashyap's content.
Jolene Henkeman	Email & Ads Marketing eCommerce customer acquisition		Tier 2	E-commerce marketing	E-commerce marketers are champion profiles. They may not own the website budget alone, but they influence conversion, retention and campaign performance conversations.
Prachi Kumar	Partnerships @ OneXtel WhatsApp, RCS & SMS growth	OneXtel	Tier 2	Partnerships / Commerce comms	Partnerships and messaging leaders sit close to commerce growth. This is useful ecosystem reach for brands that sell through owned channels.
Anth Walker	Director of Finance at Visualsoft	Visualsoft	Tier 2	E-commerce finance	Finance leadership at an e-commerce/software company is a practical business signal: people around budget, growth and margin are seeing the account.
Chintan Raval	Driving SaaS revenue Account Executive at SwiftSku	SwiftSku	Tier 2	SaaS GTM	GTM viewers in commerce software can become connectors. They understand the buyer pain and can carry Kashyap's name into SaaS/e-commerce conversations.
Dinesh Kumar	Senior Technical Lead Shopify & Full-Stack Expert		Tier 2	Shopify technical	Senior Shopify technical viewers are credibility validators. They may not be buyers, but they can validate Kashyap's technical judgment publicly or through referrals.
Fakhruddin KW	Software Developer .NET, SQL, SPFx, SharePoint, Power BI, Azure		Tier 3	Tech practitioner	Not direct buyer, but technical practitioners amplify credibility and widen software-community reach.

How to read this

Tier 1 is the commercial audience to watch closely. Tier 2 can influence referrals, implementation and category credibility. Tier 3 is useful reach, but not the priority follow-up list.

Profile Visitors - Classified 3

Tier 1 buyers, Tier 2 champions and Tier 3 ecosystem signals

Name	Title	Company	Tier	Category	Why ICP matters
A recruiter	Recruiter profile viewer		Tier 3	Recruiter / Talent	Recruiters are not the primary ICP, but they show Kashyap is being discovered by adjacent professional networks.
Meda Riya Reddy	AI & Machine Learning enthusiast Deep Learning, NLP, Computer Vision		Tier 3	AI practitioner	AI practitioners expand topic reach around AI and product quality. Useful for reach, less useful as a direct buyer signal.
Gyorgy Richard Kiss	Business Development & Client Partnership Manager		Tier 3	BD / Recruitment	Adjacent business-development reach. Useful for network spread, but not a core Shopify buyer signal.
Daniel Dramshev	HVAC Marketing Consultant		Tier 3	Adjacent marketing	A cross-industry marketing viewer shows the ideas are understandable beyond Shopify, but this is not a priority buyer segment.
Anza Javaid	Lead 3D Artist AI + 3D workflows for video production		Tier 3	Creative / AI	Creative AI attention supports the visual-quality theme, but it is an ecosystem signal rather than a direct commercial ICP.
Ibraheem Rashid	Senior Business Development Professional		Tier 3	BD / Partnerships	Partnership viewers can spread the content, but this profile is more connector than buyer for Kashyap's offer.
Hardik Rathavi	Bubble.io Certified Shopify Laravel Developer		Tier 3	Developer	Developer attention helps with technical credibility and peer validation, but it is not the main buyer group.
Ankur Singh S	Shopify Developer Liquid, custom sections, theme customization		Tier 3	Shopify developer	Shopify developers are ecosystem amplifiers. They can validate craft, but the commercial priority remains founders and brand-side teams.
Someone at ZEPIC	Company viewer	ZEPIC	Tier 3	Company viewer	Useful as a company-level signal, but the screenshot does not give enough role context to treat it as a direct ICP buyer.
Product Manager at Baidu	Product Manager	Baidu	Tier 3	Product / Tech	Strong tech credibility signal, but not a direct Shopify buyer unless future context reveals commerce ownership.

How to read this

Tier 1 is the commercial audience to watch closely. Tier 2 can influence referrals, implementation and category credibility. Tier 3 is useful reach, but not the priority follow-up list.

Profile Visitors - Classified 4

Tier 1 buyers, Tier 2 champions and Tier 3 ecosystem signals

Name	Title	Company	Tier	Category	Why ICP matters
Project Manager in IT Services	Project Manager	IT Services	Tier 3	IT services	Project-management viewers broaden the technical audience, but this is weaker than founder, brand, or Shopify-specific attention.

How to read this

Tier 1 is the commercial audience to watch closely. Tier 2 can influence referrals, implementation and category credibility. Tier 3 is useful reach, but not the priority follow-up list.

Tier 1 - Direct ICP Signals

Founder, Shopify, retail, brand-side and ecosystem buyer signals

Bagher Ahmadi - Shopify AI / Fashion

Direct ICP signal. AI styling for Shopify fashion sits exactly at the intersection of premium commerce, fashion, product experience and conversion.

Aishwarya Puranik - Luxury retail / Brand

Luxury retail cares about taste, perception, visual trust and premium buying behaviour. This is the audience Kashyap needs for high-ticket Shopify work.

Khayelihle Ntaka - Founder

Founder attention matters because founders buy judgment, not just implementation. A founder viewer is a possible buyer, referrer or strategic connector.

Someone at Lieblingsgarn GmbH - E-commerce brand

Brand-side company viewer. More commercially useful than broad practitioner attention because this can become a direct lead.

Someone at Refactor Plus - Shopify ecosystem

Agency/ecosystem attention means Kashyap is being watched inside the category where referrals and comparisons happen.

Yash P Y - Shopify / CRO

Direct category fit: Shopify, CRO, custom development and growth strategy. This viewer validates the exact positioning lane.

Someone at Wellness Extract - Wellness commerce

Wellness is a strong Shopify/D2C category. A company-level viewer is a possible buyer signal, especially when Kashyap is writing about premium product pages and trust.

Someone at Duck.design - Design / Commerce

Design-company attention matters because Kashyap's premium Shopify positioning depends on taste, conversion and visual authority.

Sagar Vaghela - Shopify design / CRO

This is a direct category signal. Shopify design and CRO specialists watching Kashyap means his authority is landing inside the same buying and referral ecosystem.

Marco Ciaccia - Founder

Founder viewers matter because they can buy, refer, or benchmark Kashyap against alternatives. This is higher-value attention than broad creator engagement.

Viewer Evidence

Profile viewer screenshots from LinkedIn

Why this screenshot matters

This is where the audience intelligence starts: Bagher Ahmadi, Aishwarya Puranik, Khayelihle Ntaka and company-level e-commerce viewers are all commercially relevant signals for Kashyap.

Strategic read

The audience is not random. Software, retail, apparel, marketing and design services are the exact context where premium Shopify positioning can convert into business opportunities.

What This Audience Is Telling You

July strategy from viewer intelligence

Premium Shopify is the right lane

The audience mix supports Kashyap's strongest positioning: premium Shopify work that connects design, trust and conversion.

AI should be discussed through trust

AI-commerce viewers are present. Kashyap should talk about AI only through buyer trust, product presentation and brand risk.

Luxury and retail viewers matter

These viewers care about perception, visuals and brand confidence. They are not looking for commodity Shopify execution.

Founder viewers are warm signals

Founder and company-level viewers should be treated as relationship opportunities, especially when they fit e-commerce or software.
